example window centered at position 2
positions 1–3: [0, 1, 1]
b
Each point comes from one 3-value window centered at that position
output value
rising: [0, 1, 1]
edge = +1
flat: [1, 1, 1]
edge = 0
falling: [1, 1, 0]
edge = -1
green = (left + center + right) / 3
red = right − left
Local mean [1/3, 1/3, 1/3]
Edge response [-1, 0, 1]
